

## Components Hierarchy:

## Mid-fi Mock Up:

### Pieces of State:

- Project Selection
- Split Flap animation
- Contact Form

I feel as if I had to take a little bit of a different route in this project than I have previously. I started to add state because I don't know what I want my final UI to look like. I'm still iffy on color but I do like the layout I have so far. Therefore, I started to add some pieces of state and continued working through the process. I was able to get the Split flap display working which was my biggest concern. Even though I am not done with my UX/UI, I was able to get a lot of state implemented, therefore I am still at a good pace.
